

## **ABOUT PB LIGHTING**

We are a manufacturer's representative company based in New Jersey. Our aim is add value and performance to any of your lighting design needs. Our knowledgeable staff works closely with professionals in all aspects of the electrical community to ensure proper design & smooth job flow. Our Energy Division can assist with new technology jobs that qualify for state and utility incentives, including solar, induction, LED, and energy star linear fluorescent options. We can help design and implement green energy solutions and work with national accounts divisions to offer services compliant with rebate plans throughout the continental U.S.

In conjunction with the New Jersey Clean Energy Program and our licensed energy partners, PB Energy's goal is to work with the distributions, contractors and end-users through every step of the process. From idea to installation, PB Energy will be available to ensure that the latest and most energy efficient products are being used while taking full advantage of all rebate programs. In addition, PB Energy will be available to assist the end-user in completing any rebate paperwork required for the Utility Programs. Let us show you how the advancements in T5HO, LED, Induction, Solar and Hybrid fixtures are just the start of promising things to come.
